Description

The 250 L spill bund collects leaks and drips from the containers stored on its removable grating.

Advantages

- Bund made entirely of polyethylene, fitted with a removable grating.
- Fork pockets: handling with most forklift trucks and pallet trucks.
- Made of polyethylene, fully recyclable, resistant to most chemicals and to UV.

Applications

The bund is suitable in particular for:

- non-road diesel, heating oil, diesel and petrol;
- AdBlue®;
- lubricants and oils;
- paints;
- other chemicals, for example chlorine, sodium hydroxide, nitric acid, hydrofluoric acid, hexafluorotitanic acid.
