1,100 L SPILL BUND FOR DRUMS AND TANKS

D03-RET-FT-001

Product data sheet · Spill containment

One-piece PE spill bund with a capacity of 1,100 L, fitted with a grating, for storing 2 IBCs of 1,000 L or 8 drums of 220 L of corrosive or non-corrosive products.

Technical data

Containment capacity	1,100 L
Material	PE (polyethylene)
Accepted liquids	Corrosive and non-corrosive products
Resistance	Chemicals and UV
Grating	Yes, in black reinforced polyethylene
Bund colour	Black or yellow
Stackable	Yes
Dimensions (L × W × H)	2450 × 1450 × 575 mm
Weight	113 kg

Description

The 1,100 L spill bund collects leaks and drips from the tanks and drums stored on its grating. It can hold 2 IBCs of 1,000 L or 8 drums of 220 L.

Advantages

- One-piece bund made entirely of polyethylene, 100% recyclable.
- Reinforced polyethylene grating.
- Material suitable for storing highly corrosive products (see Applications).
- Stackable bunds.
- Fork pockets: handling by forklift truck or pallet truck.

Applications

Areas of use: laboratories, universities, schools, garages, agriculture and industry.

The bund is suitable in particular for:

- non-road diesel, heating oil, diesel and petrol;
- AdBlue®;
- lubricants and oils;
- paints;
- other chemicals, for example sodium hydroxide, nitric acid, hydrofluoric acid, hexafluorotitanic acid.
