SECONDARY CONTAINMENT TANK

D03-RET-FT-006

Product data sheet · Spill containment

Cylindrical secondary containment tank in low-density polyethylene, from 50 to 250 L. It retains the contents of a storage vessel if the vessel fails, without spillage onto the ground.

Technical data

Capacities	50, 100 and 250 L
Material	Low-density polyethylene (LDPE)
Colour	Natural
Bottom	Flat
Resistance	Weather

Description

The secondary containment tank provides protection if a storage vessel fails: the contents of the vessel are retained in the containment tank and cannot spread onto the ground.

1. Secondary containment tank

Advantages

- Light and stable.
- Robust and weather-resistant.
- Flat bottom.
