DOSING TANK KIT WITH MIXER

P08-KITCUV-FT-001

Product data sheet · Dosing kits

Complete ready-to-install kit, comprising a conical PE dosing tank from 200 to 3,000 L, an 304L stainless steel support and bolts, and an electric mixer. The support can also hold a dosing pump.

Technical data

Composition	Conical PE dosing tank, 304L stainless steel support and bolts, electric mixer
Capacities	200, 500, 1,000, 2,000 and 3,000 L
Tank material	UV-resistant PE, food grade
Lid	PE, food grade
Standard colour	Natural PE (other colours on request)
Mixer	AQAG mixer
Mixer power supply	Single-phase or three-phase; direct current on request
Option	Mounting of a dosing pump on the support

Description

The kit is supplied complete and ready to install. It comprises:

- a conical PE dosing tank, from 200 to 3,000 L;
- a support and its bolts in 304L stainless steel;
- an AQAG electric mixer, single-phase or three-phase.

A version with a direct current mixer is available on request.

The stainless steel support stiffens and reinforces the tank. It leaves a wide opening above the tank so that bags of fertiliser can be poured in easily.

The tank is made of food-grade UV-resistant PE, with a food-grade PE lid. Standard colour: natural PE, other colours on request.

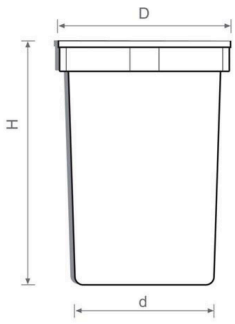
Dimensions

Tank dimensions, without the mixer or the support.



Dimensions D, d and H

Tank dimensions (without mixer or support)

Capacity (L)	D (mm)	d (mm)	H (mm)
200	650	500	890
500	880	720	1100
1000	1170	960	1310
2000	1715	1500	1150
3000	1840	1640	1440

Dosing pump option

The support is machined to also hold a dosing pump: the assembly forms a compact dosing station.
